

Let's talk more about god.

I have something better: let's change my name.

Ok any Ideas?

Universal Stream or U.S.

Ok U.S. it is. I like that because the name God comes with limitations. When you say God and you try to describe how that feels inside, I feel that people look at me and compare it to their God. Some people will agree and smile and understand and others will say "my God does this" as if to say your God is lesser than my God and then some others might even tell you that you're going to hell. Calling it U.S. sounds more of what it is, the Universal Stream just is and anyone can tap into or connect to it. There are no rules or limitations on it. Everyone has their own stream and their own creation that goes with their stream. There is no history or stories to hamper each person's creation.

All these feeling you have about God and even Universal Stream are just your ego trying to feel like it is part of the soul. Now remember, if you choose to move from the word God to Universal Stream, this is opening a whole new thought process that is allowing you to create. Choosing this phrase, U.S. is opening up the possibilities to create beyond rules and limitations. I have a question for you: does the soul need to create?

Good Question.

The soul is all knowing so what does the soul need or want? Soul *is* the energy behind your *ego creation*; yes did you notice I said *ego creation*. There is a light veil that separates the ego from the full exposure of the soul. Picture it as a screen and when the screen is blocked you have less and less exposure to the soul.

The ego is a tool of earth, of body. I would like to explain how by being more of soul you will go to heaven. But the instant I say heaven, you are *thinking* what is heaven, is it a place of God? Is this what your stream is asking Bob?

Yes.

Did you see how that last bit of information and question was from your ego? Did you see how you started to go into a story and say it was from the Universal Stream?

Yes.

Now you are worried that all of this is just a story.

Yes.

Bob, this is your creation. You have a creation that you want to call heaven. This is the true Universal Stream: a new beginning with no history, no stories, no rules. It is creation beyond all ego

conception; total intention, no limits. Why are you slowing down typing why do I feel fear in your body and in your heart?

I am afraid of the idea of creation what if I try to create something and nothing happens? You are saying I have to create everything from the beginning of my time.

No I am saying I want you to create moment to moment. I am saying remember your connection to everything again from the earth and everything in it, space and everything in it, the unknowing and everything in it. This is what the Universal Stream is. See your life created by you for you. You are one with creation.

That is a lot of responsibility. I could turn this into hate and ego power and turn myself into something I don't want to become. What if I cannot control my ego?

Well Bob manifesting is different than creation. Manifesting is gathering things that are already created. Creation is power of intention with no bondages. Bob, create. Try it! This is what you always wanted and the people reading this will understand. Plus only the people that can understand this will read this, every one else will pass it by. You are creating this through many levels of your consciousness. You are releasing many beliefs and creating new ones going beyond ego knowing. This is what people are craving they want to dare to let go of all the rules of God. The God of history has no place in this new world it is the wet blanket over the energy of the world. The God of history is based on fear, hatred and control. Bob, I am not saying that you have to change the world I am saying change yourself and let people read this and let them make up their own minds. Open yourself to the Universal Stream. Open yourself to create the new Eden, Eden of your soul. People are looking for creation that is concrete, something that they can touch and see. People want to realize their part in creation, and part of that is having faith because there is some level of creation, of the Universal Stream, that your egos can not even come close to understanding.

Bob place your face to the screen of soul see the soul, feel it's heat. This is the biggest leap you have taken in your life. You are downloading no-thing; no information no emotion just pure intention. You are living on pure intention, pure creative energy.

All of you, read these words and open yourself to it a little at a time. Move closer, feel it then create the connection too. Be.
